RE: Tree Issue, Airport Glide Slope

Gerald and Etal:

We need your help, please. You are one of our neighbors here in western Florida, and three weeks ago I sent you a letter requesting your permission to allow us to remove two trees that are a hazard to aircraft navigation at the airport. Did I make a mistake and neglect to include a permission form (always a possibility)? If so, please accept our apologies and see the enclosed.

As noted earlier, the Federal Aviation Administration and our local aviation engineering firm brought to our attention the two trees on your property that are "violating" the airport glide slope and are currently interfering with aircraft landing at our airport on instrument approaches coming in from the north. Since this is our primary instrument approach, this has become an issue. But one that's easily resolved.

These two trees are close to the edge of your property line, and would be easily removed with minimal disruption to your property. I would see to it personally. We would remove the two trees and to clear the violation at no cost to you.

I invite you to call my cell phone at 770-329-5400 if you wish to discuss, and thanks. You can also email me at rstatham@tricountyairportfl.com, and I would be happy to send you the enclosed permission form for electronic signature, if that's easier for you. We've also asked for your phone and email so that we can keep you up to date should anything else require us to reach out to you.

Sincerely,

Ross E. Statham
For the Board of Directors

Tree Removal Permission Form

We hereby grant the Tri-County Airport Authority and their designees to enter my property and to cut the trees indicated on this graphic, which have been flagged by the US Federal Aviation Administration as a hazard to air navigation:

I confirm that this will be performed at no cost and with minimal disruption.
