Re: **Technology/Secretary Report**

Date: January 7, 2021 (REVISED January 11, 2022)

1. The website is working very well, with **no known tech issues open**. We continue to receive positive feedback as to the quality of the site, its organization and its usefulness. I do have plans to *eventually* migrate to a WordPress platform at some time in the future and to jazz it up with more graphics and videos. But for now—we're good.
2. The airport manager also has credentials for the host and the control panel as a redundancy measure.
3. The blocking of our emails by AT&T has been fully resolved. This was done by contacting their "postmaster" twice via email and sending them copies of the block.
4. The status of emails sent from AVCON users to our KBCR.GOV email is ~~still unknown. Open issue. This is the only know open email issue we are experiencing.~~ that is has been fully resolved by ACCON and is now fully working.
5. Plans to migrate from our current website to WordPress or another content management system are on hold for another year. Our current site is stable, information is readily available and we are receiving quite favorable comments.
6. Regarding the HP printer that I use to print reports for our meetings, I have been very happy with it since I stopped trying to use cheap aftermarket toner and stuck with HP high yield toners. The toner that I purchased in June of this year is still going strong. No issues.
